

INTRODUCING...

THE #4700 "PORTA-SCALE"

The push for profits in a competitive market is here. You need the facts and figures if your hog operation is going to be profitable.

The new "Porta-Scale" baby pig scale can help give you those facts! This scale features a durable welded frame and incorporates a simple weigh mechanism which eliminates costly parts which add to the cost of competitor's scales.

Check sow's productivity – weigh pigs at birth, at weaning – and more. A durable, lightweight high density polyethylene tub provides a useful work station for day-old processing. Large, durable casters and wheels make the unit totally mobile for use in any location.

A Versatile, Accurate, Economical Baby Pig Scale & Processing Station
